

Please visit your App Store and search for “Coalition Physician Well-Being” to download.

Members will have access to all features on the app but will need to login to view. Once downloaded, please select the “Login” tile and enter your username and password.

This is the same login information you would use to login to the member site on the Coalition website. Your username should be your email address provided at member registration. Please note that it is case sensitive. If you do not remember your password or have not set up a password, please use the following link to reset/establish a password: [Click here](#).

Once logged in, your screen should appear as seen on the left. Some of the tiles will open our web pages containing the pertinent information.

Please be sure to use the app back arrow to navigate back to the main tiles on the app and be careful not to log out of the app on the website. If you do, you will need to log back in the next time you launch the app.

We advise that you save your username and password should you need to reference it again in the future. Please contact Michelle Vazquez if you should have any problems with your login at michelle.vazquez@adventhealth.com.

We hope that the mobile app will be beneficial in supporting your work and be of increased value to your membership.
